Overview

The State of the Global Islamic Economy (SGIE) Report 2023 states that the Islamic market in Indonesia ranked as the third largest in the world in 2023. With increasing interest among communities in products and services adhering to Islamic principles, the SGIE presents significant opportunities for countries with Muslim-majority populations to expand their presence in the Islamic economy market.

With Indonesia's Muslim population reaching 240.62 million in 2023, equivalent to 86.7% of the national population, the country possesses substantial potential to emerge as a key driver of the global Islamic economy. This potential is further underscored by the worldwide Muslim population, which stands at 1.9 billion.

The report paints a dynamic picture of the global halal industry, forecasting a promising trajectory amidst challenging economic conditions. With an estimated 1.9 billion Muslims spending around USD 2.0 trillion in 2021, the industry has experienced remarkable growth, boasting a compound annual growth rate (CAGR) of 8.0% from 2015 to 2021. The major reason behind the halal industry's growth is the increasing Muslim population and their adherence to halal practices.
